Summary

I am a student who is passionate about software development and technology. I enjoy learning new programming languages, exploring different technologies, and building projects that improve my skills. I have experience working on web applications, REST APIs, desktop applications, Android apps, and games using technologies such as C#, JavaScript, .NET, SQL, Unity, and Git. Through projects like SariSync, Anatomia, and Survival Rush, I continue to develop my problem-solving skills and understanding of software development. I am eager to gain more experience, learn from others, and grow as a future software developer.

Experience

Main Programmer – Capstone: Anatomia 3D 2025– Present

Academic Project

- Creating an end-to-end Unity educational application that enables users to explore 3D anatomy models and identify bones by tapping them.

Freelance Web Developer 2023–Present

Independent

- Provide commissioned web development services, including portfolio websites, academic projects and custom web solutions.
- Build responsive front ends, small utility tools
- Develop games, desktop and mobile apps with C#, .NET, Unity and Android Studio.

Projects

- **Anatomia3D** — a gamified mobile application designed to make learning human anatomy interactive and engaging. Built with Unity and C#, it combines educational content with game-based learning to help users explore the human body's structures and systems in an enjoyable way.
- **KitsuneScan** — a manga reading website that allows users to explore, search, and read manga through a clean, user-friendly interface. Designed for manga enthusiasts, it provides a convenient way to discover and enjoy manga online.
- **KitsuneWave**— an anime streaming website that lets users explore, search, and watch a wide selection of anime through a clean, user-friendly interface. Built with React, JavaScript, HTML, and CSS, it provides a convenient anime browsing and streaming experience.
- **SariSync** — a sari-sari store management system designed to simplify inventory tracking, sales monitoring, and store operations. Built with C# and .NET, it helps store owners manage products, organize transactions, and streamline daily business activities through an integrated management system.
- **GogetCash** — a financial management application designed to help users track their income, monitor expenses, and manage their finances more effectively. It aims to simplify everyday money management through a practical and user-friendly interface.
- **Survival Rush** — a 2D survival shooting game built with C# and Windows Forms. Players battle enemies, survive increasingly challenging encounters, and test their skills in fast-paced gameplay. The game features interactive menus, sound effects, and an engaging arcade-style experience.

Skills

Programming languages: C#, JavaScript, Kotlin, SQL, HTML5, CSS3
Frontend development: React, Vite, Responsive web design, Tailwind CSS, CSS frameworks
Backend development: ASP.NET Core Web API, Node.js, Express.js, REST APIs, Clean Architecture, Entity Framework Core

Mobile and game development: Android SDK, XML layouts, Unity, Windows Forms
Databases and cloud: Microsoft SQL Server, Firebase
Tools and deployment: Git, GitHub, Visual Studio, VS Code, Vercel, NuGet, Postman

Education

Bachelor of Science in Information Technology
College of Our Lady of Mercy of Pulilan Foundation, Inc. | 2023 – Present
• Focus areas: web development, application development and information technology.

Senior High School – Academic Track, STEM Strand | Richwell College, Inc. | 2020 – 2022

Certifications

The Origins 3: JavaScript — Codedex, July 2025
Introduction to Cybersecurity — Cisco Networking Academy, November 2025
Felta Techvoc Academy Inc — Felta, November 2024
Wadhwani Foundation Certificate — Wadhwani Foundation, March 2026
